Begonia I'Conia®
Valencia Pink

2027 Annuals

WELCOME

On behalf of the Dümmen Orange team, we are proud to present this year's Annuals Catalog—designed to inspire, innovate, and support your success in a constantly evolving market.

As consumer trends continue to evolve, we remain focused on categories that complement and strengthen the overall assortment. For the first time, we are featuring our ***Welcome to the Jungle® foliage collection*** within this Annuals Catalog, now with its own dedicated section (see page 71). Foliage continues to be a growing category, bringing texture, versatility, and strong consumer appeal alongside annuals.

This evolution naturally connects to one of the most dynamic areas of our portfolio—combinations. Within our ***Garden Party program***, we continue to push boundaries with exciting new concepts. From the new Shade Princess series, thoughtfully designed mixes of annuals and foliage for low-light spaces, to our ***BlooMix concept***, pairing two perennials with one annual, we are reimagining how combinations can drive category growth and consumer engagement.

To further support your success, we have introduced a new ***Culture Guide section*** (pages 260–277), providing propagation and finishing information for all monocrops. This addition is designed to ensure ease of use and help you get the most out of our genetics.

Our goal is simple: ***Deliver innovative, high-performing varieties while making it easier to do business with us.***

We look forward to growing together.

The Dümmen Orange Team

TOP PICKS

THE BEST IN BLOOM:
Dümmen Orange Portfolio Top Picks

From unique varieties to tried-and-true winners, Dümmen Orange brings growers genetics that always deliver.

DÜMMEN ORANGE®

For our full availability on Top Picks, visit **na.dummenorange.com**

INTRINSA
plant power

DISCOVER INTRINSA®

Plants Powered for a Greener Future

Instrinsa® varieties harbor **natural resistances as defenses** against specific pests and diseases; providing **strong** and **healthier plants**.

Resistances commercially available against the following diseases:

+ **Petunia**
  Tobacco Mosaic Virus Resistance
+ **Garden Mum**
  White Rust Resistance

What This Means for Growers & Retailers:

+ Fewer crop losses
+ Lower chemical inputs
+ More consistent performance

DÜMMEN ORANGE®

Predictive Breeding

Data-based breeding accelerates innovation using **big data**, **DNA insights**, and **predictive tools.**

Faster, more reliable selection of top-performing parents and offspring through **marker-assisted breeding**.

Genomic selection enables **quicker development** of varieties with **improved traits** which classical breeding has not been able to achieve.

Production Innovation

CELL BIOLOGY TECHNIQUES enable **faster breeding pipelines,** creating **novelty** and **'crossing outside-the-box'.**

PLANT PHYSIOLOGY RESEARCH supports producing more **resilient cuttings** and **crop performance stability.**

IN VITRO SYSTEMS deliver rapid, **true-to-type multiplication** and **rejuvenation** for **consistent commercial quality.**

Integrated across Dümmen Orange programs, these tools enhance:

- **Breeding efficiency**
- **Production efficiency**
- **Supply chain resilience**

CONFETTI GARDEN®

One Plug. Endless Possibilities.

Texture, tone, and trendsetting color—Confetti Garden® does it all.

GET INSPIRED!

Get inspired with Confetti Garden® combinations where textures, tones, and trend-setting color come together effortlessly. Designed to spark creativity, these expertly curated mixes make it easy to build eye-catching programs.

CREATE BEAUTY!

Create beauty! Embrace a rainbow of options suited for sun, shade, or anything in between, and help your consumers create a beautiful backyard staycation space that their yards deserve.

PERFECTLY DESIGNED.

Confetti Garden® combinations work together from the very beginning, allowing growers to stick cuttings together with perfectly matched cultural requirements.

Look for this icon to identify varieties with Intrinsa® breeding.

INTRINSA plant power

Intrinsa® brings advanced techniques to traditional breeding to create worry-free varieties for a more sustainable and economically protected future.

Intrinsa® products are Patent Protected.

Welcome to the

JUNGLE®

Dümmen Orange's Welcome to the Jungle® program pairs some of nature's easiest plants with world-class breeding and clean, dependable production for professional growers.

Our 35 acre production facility in Antigua, Guatemala supplies high-quality unrooted cuttings of a diverse mix of genera, providing your customers with a trendy mix of foliage textures, colors, and growth habits. Cuttings are packaged according to each variety's individual needs to ensure happy, healthy cuttings every time.

Distribution Notice: This product and all related materials are intended solely for sales and distribution within North America.

Welcome to the Jungle® | Aptenia

Aptenia is a vibrantly beautiful ornamental succulent, ideal for gardens, containers, and hanging baskets. Commonly known as Variegated Baby Sun Rose due to its dainty red blooms, this variety's drought and sun tolerance give it an easy-care nature.

Welcome to the Jungle®

Welcome to the Jungle®
Fittonia Pitaya | 86776

Welcome to the Jungle®
Fittonia Zebrano 86599

Fittonia, commonly known as "Nerve Plant", are characterized by the thin, white veins on their leaves. Wonderful as houseplants for tabletops, hanging baskets, and terrariums, Fittonia will spread up to 18". Their richly colored leaves traced in white veins add a distinctive touch to indoor décor or in ideal conditions as a sprawling groundcover. Typically only blooming outdoors, Fittonia will develop tall spikes covered in delicate yellow flowers.

BRIGHTEN YOUR SPACE WITH TRADESCANTIA NANOUK!

Welcome to the Jungle® with Tradescantia Nanouk! With its bold pink, purple, and green foliage, this low-maintenance beauty adds a vibrant touch to any room. Fast-growing, petal-soft, and perfect for shelves or hanging planters—Nanouk is the statement plant your space deserves!

I'CONIA®
GARDEN BEGONIA

I'Conia® begonias are the *most luxurious series* of hybrid begonias available for both *sun and shade.* Bred equally for foliage and flower, these exquisite plants make a *dramatic statement* in the garden, combination containers, and hanging baskets.

I'Conia® is available in four distinct families to make programming and sizing easier.

Begonia
I'Conia®
Bacio White
50752

I'CONIA® BACIO

The newest family to the I'Conia® brand, Bacio has naturally compact plants that are perfect for smaller container sizes and dazzle with a profusion of brightly colored flowers on dark, rich foliage.

Compact • Ideal for quart pots

I'CONIA® PORTOFINO

Luxurious Portofino has rich, dark-chocolate foliage a striking backdrop for the brightly colored semi-double blooms. The mounding habit works well in containers or hanging baskets for dramatic statements in both sun and shade.

Semi-double blooms • Ideal for 6-inch up to hanging baskets.

Begonia
I'Conia®
Portofino
Dark Orange
50882

Begonia
I'Conia®
First Kiss Hot Pink
50639

I'CONIA® FIRST KISS

Magical, like a first kiss, this series is vibrant, upright and strong The semi-double flowers have semi-vigorous growth and excellent branching. Great garden performance in both sun and shade.

Semi-double blooms • Ideal for 8-inch pots, upright deco containers, and landscapes

I'CONIA® MISS

Miss Malibu, Miss Montreal and Miss Miami are the stunning trio in the hanging basket program. They have the rich, fully double blooms of an I'Conia® begonia, but with a stunning cascading habit.

Ideal for hanging baskets.

Begonia
I'Conia®
Miss Miami

Begonia | I'Conia® Bacio

Bacopa I'Conia® Bacio
Lemon | **50004**

Bacio means "little kiss" and that's exactly what these are, compared to our best-selling Portofino varieties. The I'Conia® Bacio lineup has the same vibrant blooms and exquisite foliage, but on naturally smaller plants, making them an ideal selection for quart containers or as a component in smaller combination planters.

Begonia | I'Conia® Portofino

Begonia I'Conia® Portofino
Dark Orange

Portofino varieties are the most premium lineup of luxury garden begonias available. These hybrid varieties have plump, oversized double blooms, contrasted against the dark decadent chocolate foliage. These varieties are suitable in container sizes from quarts to 8-inch in the garden center, and will perform with ease in sun or shade for the gardener.

Our most compact series, Down Town® is finely textured with multi-toned foliage and a compact habit that gives small spaces a bold look. Its compact-medium vigor works in quarts and gallons.

GREAT FALLS® SERIES

Great Falls® coleus are the perfect trailing addition for mixed containers and hanging baskets, in both sun and shade. Perfectly uniform across the series and semi-compact.

STAINED GLASSWORKS® SERIES

Stained Glassworks® have bright colors & fun textures, perfect for shade combination plantings or mono-pot sales. Suitable for quarts up to gallon container sizes; medium-large vigor.

MAIN STREET SERIES

The Main Street series of coleus are the industry standard for garden and landscape performance. Full sun or full shade performance with large full-figured habits; vigorous.

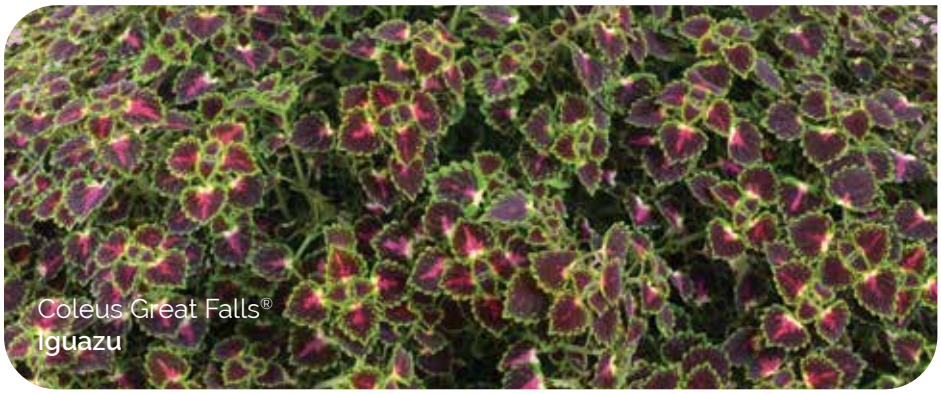
Coleus | Great Falls®



Coleus Great Falls®
Iguazu

Great Falls® coleus are the perfect addition for mixed containers and hanging baskets, in both sun and shade. The structure of these plants provides a great chassis for other annuals to blend with for a perfect balance of flowers and foliage. All varieties are mutations of one another, making them perfectly uniform across the series.

Better Together ▶ MIX N' MATCH

The Better Together program from Dümmen Orange provides the easiest solution for growers to produce exciting combinations that offer a wide array of vibrant colors and go the distance for all-summer color.

Great Falls® coleus varieties blend seamlessly with three of our other top-performing heat-tolerant genetics for no-fail summer color. And with impeccable uniformity across all lines, growers can mix and match any varieties for combinations that turn out perfect, consistently.

LOVES the *Sun* ▶

BIG EEZE GERANIUMS + GREAT FALLS® COLEUS

Big EEZE geraniums are an industry-leading interspecific series with outstanding and all-summer durability. They have a mounding habit perfect for hanging baskets and patio containers.

◀ LOVES the *Sun & Shade*

I'CONIA® BEGONIAS + GREAT FALLS® COLEUS

I'Conia® begonias are an ideal choice for heat-loving combos that thrive in both sun and shade. I'Conia® Miss varieties work best with Great Falls® coleus for hanging baskets, with their cascading nature, while the Upright types are well suited for patio planters.

LOVES the *Shade* ▶

MAGNUM NEW GUINEA IMPATIENS + GREAT FALLS® COLEUS

We love the Magnum and Great Falls® combo for brilliant displays in shady locations. These perfectly mounding habits make them ideal for both baskets and containers. The massively oversized blooms of Magnum varieties make a bold statement against the tricolor foliage of the Great Falls®.

DÜMMEN ORANGE.

DAHLIAS

A STAPLE FOR EVERY BEDDING PROGRAM...

EVERYTHING GROWERS NEED, FROM 4" TABLETOP DISPLAYS TO LARGE CONTAINER THRILLERS AND MEGA PERFORMERS FOR LANDSCAPES.

NOVATION® SERIES

Novation® dahlias are early season and are a perfectly uniform series designed for grower programmability. All varieties flower within three days of one another and have full, very densely branched plants that are ideal for high-density production.

DAHLINOVA® SERIES

Dahlinova® is very versatile in the landscape and thrives in containers and sunny flower borders, producing an abundance of large, ultra-bright blooms all summer long. A great garden performer and super cut flower.

STARSISTER SERIES

The Starsister series are known for their visually striking blooms with bold bicolors and unique flower forms. These plants have a compact to medium vigor, ideal for quarts to 8-inch containers.

HYPNOTICA® SERIES

The Hypnotica® series brings growers a full range of colors on fully double flower forms. These medium to high vigor plants are ideal for larger container sizes and display fantastic garden performance throughout the summer.

SUMMER BEES SERIES

The Dahlia Summer Bees series combines aesthetic charm with bee-friendly design for vibrant, long lasting color in any garden.

TEMPTATION SERIES

Temptation dahlias are a real highlight with their jet-black foliage setting a dramatic background for the vividly colored and fully double flowers. The series is exceptionally uniform across colors with a mid-vigor for larger containers and combination planters.

MEGABOOM SERIES

MegaBoom takes an extra-large flower size and places it right on top of the plant for an especially dramatic splash of color in large combination containers or in the front of the garden border.

XXL SERIES

XXL dahlias are an industry favorite with their oversized blooms towering above the plants on tall, elegant peduncles. These varieties are the most award-winning dahlias in summer trials across North America for their superior garden performance.

Ballerina™

DANCING COLORS

LEARN MORE

The *star* of the show is Fuchsia Ballerina™

- Our Fuchsia series has strong, day-neutral and well-branching plants that are naturally compact.
- Ballerina™ performs exceptionally well on balconies and terraces or flower beds and borders. Ballerina™ blooms reliably and persistently from early April to August.
- Their individual medium-sized flowers attract bees and other pollinating insects throughout the whole summer season.

Fuchsia | Arêtes

Fuchsia Arêtes
Belfort

Arêtes are all about grower friendliness. This series of fuchsias requires no pinch, no PGRs, and flowers freely and early for primary spring sales. Offered in both a traditional trailing habit for baskets, and also with the subseries of upright types for containers and combinations.

Fuchsia | Arêtes Upright

Fuchsia Arêtes Upright
Lago Grande

Similar to Arêtes, Arêtes Upright has less growing maintenance due to its upright habit; there is no need to space! Great for mass plantings in quarts all the way up to 1.5 gallon planters and containers. Fuchsia Arêtes Upright has great branching and is very floriferous.

Fuchsia | Upright

Fuchsia Upright
Gartenmeister | 62478

Upright fuchsia varieties make a strong showing, in spite of their somewhat delicate appearance and dainty hanging blooms. Uprights look great in garden beds, with a single or double set of petals and produce nonstop blooms from spring until autumn.

GERANIUMS

MINICASCADE
SERIES

Ivy geranium Minicascade Pink and Red have single blooms and a cascading habit that are perfect for window boxes and smaller hanging baskets.

SAVANNAH
SERIES

A great pick for a premium zonal program, Savannah varieties have a deep dark-green foliage to set them apart on the bench. Savannah varieties are also recognized for their superior plant habits across the series.

MAESTRO IDOLS
SERIES

These varieties are ideal for mid-season sales with a medium vigor for 4 and 6-inch containers, and the classic green with deep zoned leaves that consumers love.

GLORY DAYS
SERIES

Glory Days are interspecific geraniums with two beautiful heat tolerant bicolors, Pink Bicolor and Red Orange Bicolor. Glory Days have single flowers that are self cleaning and a semi-trailing habit that is medium to vigorous; great for hanging baskets. Foliage is green and Edema free.

GREAT BALLS OF FIRE
SERIES

A medium-vigor, heat-tolerant ivy geranium with large, double flowers and Edema-resilient glossy foliage.

SURVIVOR® SERIES

The Survivor® varieties are just that, a premium plant which will finish easily and lends itself to many container sizes and growing conditions. They have the classic lively foliage with the distinct zoning, showcasing the large flowers in bright colors.

SANTANA SERIES

The perfect pick for nonstop flowering baskets, Santana has a well-branched and controlled mounding and spreading habit for maximum flower power at retail, with unstoppable performance in the summer months for consumers.

SARITA® SERIES

Sarita® varieties are the best choice for landscape plantings where minimal maintenance is expected. The interspecific hybrid brings ultimate heat tolerance to these varieties and the extremely dark foliage keeps the flower colors popping all summer long.

BIG EEZE SERIES

Hands down, the most impressive geranium for retail sales. This interspecific has the heat tolerance of an ivy, but with the classic look of a zonal with super-sized flower power.

PATRIOT SERIES

These early-season performers explode with vigor on the bench and in the landscape. Excellent for larger container sizes and combination planters where you need to fill with color fast.

NEW GUINEA IMPATIENS

PROVIDING EVERY POSSIBLE SOLUTION...

THE TEXTURES, PATTERNS, AND COLORS, OUR PORTFOLIO WILL ELEVATE CONSUMERS' INTERESTS AND GROWERS' PROFITS.

SHADE

PETTICOAT® SERIES

The Petticoat® lineup is the preferred solution for early-season sales. This series has outstanding uniformity and a full spectrum of solid colors, stars, and frosted bicolors. The varieties have medium vigor and are the earliest to flower, making them ideal for spring pots and baskets.

MAGNUM SERIES

The Magnum series is well-known and aptly named for its impressive, oversized blooms that grab consumers' attention at retail. The plants have appropriate vigor for larger containers and hanging baskets, and the varieties match up well for easy combinations.

ROLLER COASTER SERIES

Maximize profits by offering consumers wildly unique flowers on one of their favorite bedding plant categories. The Roller Coaster varieties have wavy, three-dimensional blooms with vivid colors to provide ultimate interest in container gardens and front-of-the-border plantings.

SUN

SUNSTANDING® APOLLO SERIES

Sunstanding® Apollo is a top choice for large landscapes, with intense pure colors and exceptional vigor. Uniform across colors for easy mixing, it offers designer flexibility plus full sun and shade tolerance for versatile use in any bed.

SUNSTANDING® HELIOS SERIES

For growers looking for varieties suitable to smaller containers, or landscapers needing a front-of-border option, the Helios family offers the same characteristics as Apollo varieties, but with a 20% smaller plant habit, smaller leaves, and smaller, but more prolific flowers

SUNSTANDING® JAZZY SERIES

Jazzy varieties deliver bold, tropical impact with neon-colored flowers and striking lemon-lime foliage—true show-stoppers on retail benches and in large containers. Their eye-catching look drives sales, while decorative foliage and continuous summer blooms make them a versatile, high-value choice for combinations.

SUNSTANDING® STAND-ALONE SERIES

Sunstanding® Stand-Alone's have six colors ranging from compact to medium and medium vigor to provide versatility in the landscape under shady areas or full sun.

SHADE to SUN

Impatiens Interspecific | SunStanding® Jazzy

Impatiens Sunstanding® Jazzy
Coral + Hot Pink

Jazzy varieties add dramatic flair to the program with a bright tropical look. With intense neon-colored flowers on top of brilliant lemon-lime variegated foliage, these are showstoppers on the retail bench and in large combination containers. The decorative foliage of Jazzy varieties works equally well as an ornamental addition to combos, but with the added bonus of vibrant flowers throughout the summer.

Osteospermum | Margarita

Osteospermum Margarita
Cool Purple | 60305

The Margarita series has medium vigor, and upright with glossy, dark green leaves and large, daisy-like showy flowers that sit just above the foliage. Margaritas have great branching with excellent heat tolerance and a variety of fun colors that will bloom into summer.

Osteospermum | Margarita Plus

Osteospermum Margarita Plus
Purple

The Margarita Plus series has more vigor than the Margaritas and some cold tolerance. It is upright with strong branching, glossy, dark green leaves, and large, daisy-like flowers. It blooms early and continues in warmer temperatures. Margarita Plus is a solid performer in landscapes and containers with flower power!

PETUNIAS

PETUNIAS SIZED TO PERFECTION...

WITH THE WORLD'S MOST EXTENSIVE COLLECTION OF PETUNIA VARIETIES, YOUR PETUNIA PROGRAM IS SET FOR SUCCESS.

ORIGAMI SERIES

Strong performance and daylength neutrality with medium-sized, fully double flowers, is perfect for small container production.

POTUNIA® PICCOLA® SERIES

The reliability and uniformity of Potunia® + with a more compact habit and smaller flowers.

POTUNIA® + SERIES

Experience petunia perfection with Potunia® +! Perfectly mounded habit that grows like a bubble makes Potunia® + the grower's petunia series for premium pots, bountiful baskets, and components of colorful Confetti Gardens®. Several varieties are now Powered by Intrinsa®, providing TMV-resistance and stronger, more resilient plants with lasting beauty throughout the growing season.

SWEETUNIA SERIES

Sweetunia varieties are a grower and retailer favorite with a full habit that boasts a profusion of brightly colored and uniquely patterned blooms. Known for a medium upright habit and vigor; ideal for several container sizes and to be used as fillers in combination containers.

SURPRISE® SERIES

A spreading, vigorous habit makes early-flowering Surprise® a solid choice for landscape applications or large containers.

SURPRISE® SPARKLE SERIES

The Surprise® Sparkle varieties display an exciting twinkling effect on the petals. The plants have strong vigor and are ideal for hanging baskets and large containers.

DURABLOOM® SERIES

The world's first interspecific petunia, bred for heat & humidity tolerance and superior garden performance across North America. DuraBloom® extends the petunia growing season, thrives in the summer, and showcases vibrant blooms that stand up to heavy rain storms.

VERBENA EMPRESS®

Sun Kiss

Introducing Empress® Sun Kiss

Empress® Sun Kiss is a compact sub-series of Empress® Sun Verbena from Dümmen Orange. The compact-medium vigor with mounding habit makes Empress® Sun Kiss the ideal choice for premium pots and smaller mixed combinations.

With heat and humidity tolerance breeding from its parent Empress® Sun series, the garden performance of Empress® Sun Kiss is second to none from spring into summer.

"Chef's Kiss" to Sun Kiss

Compact-medium habit provides a new smaller size for Empress® Sun lineup.

Vibrant jewel-toned flower colors are striking alone in premium pots, in Confetti Garden® mixes, and garden beds all season long.

Flowers appear on all sides of the plant which provide an umbrella of color, unlike other Verbena.

Heat & humidity tolerance allows for extended flower season and proven garden performance.

Superior uniformity across all colors of the series.

DÜMMEN ORANGE

VERBENA

FOR EVERY POT, EVERY GARDEN...

WITH REFINED SERIES FOCUS AND UNIFORMITY, AND NOW WITH GREAT HEAT AND HUMIDITY TOLERANCE, OUR VERBENA ARE READY TO SHINE BRIGHT ALL SEASON LONG.

EMPRESS® SUN KISS SERIES

A new series of verbena with heat and humidity tolerance in containers and the landscape. The mounding habit with compact-medium vigor makes Empress® Sun Kiss the ideal series for premium containers.

EMPRESS® FLAIR SERIES

Empress® Flair has good branching with a semi-upright, medium-compact habit, and large flowers. An ideal choice for combinations.

WICKED SERIES

Unique multicolor flowers add novelty and adventure to any garden or retail display.

EMPRESS® SUN SERIES

Empress® Sun are the most vigorous, heat-loving, and mildew-tolerant verbena available. While always great in containers, this interspecific series was truly designed for the most impressive landscape displays.

Alternanthera | Various

Alternanthera
Little Ruby | 76113

Alternanthera
Red Carpet | 76102

Alternanthera
True Yellow | 76114

We love alternanthera for its colorful foliage and its versatility both indoors and out. It's a popular groundcover and used in mixed combinations where hot weather durability is a must. But these varieties are also fantastic as interior foliage items. Outdoors, these low-growing varieties of alternanthera are useful as an edging plant or the front of the border.

Benefits from shade?	Pinching	Transplant to Pinch (days)	Disease	Pests	PGR Option 1	PGR Option 2	PGR Option 3	Tips
No	Yes	7-14	B, PY, PM	A, WF, MB, T	None			Prefers high light and warm temps.
No	Yes	7-14	B, PY, RR	FG, SM, SF	2500 ppm B-9 if needed			Prefers warm temps.
No	Yes, soft pinch	As needed to shape	PY	FG	None			Requires good drainage. Grow in full sun to avoid stretch. Yellow leaves at base typically a result of poor air circulation.
No	Yes	As needed to shape	B, PY, R	A, WF, T, FG	1000-1500 ppm B-9	300-500 ppm Florel		Finish cool. Avoid overwatering, but do not allow to completely dry down. Monitor media for high pH/iron deficiency and supplement with chelated iron as needed.
Yes	No	N/A	B, X, PM	BM, T, WF	500-1000 ppm Cycocel	1000-1500 ppm B-9 as needed	1000-1500 ppm B-9 + 250- 350 ppm Cycocel tank mix as needed	Light levels not to exceed 4000 fc and maintain a stress free environment during vegetative growth. Plant should be 2/3 desired finish size before initiating flowers.
Yes	Yes, soft pinch	7-14	PY, R, PM	BM, FG, SF	750 ppm Cycocel	0.1-0.25 ppm Bonzi drench, volume calculated if needed to hold		Light levels not to exceed 4000 fc and maintain a stress free environment during vegetative growth. Plant should be 2/3 desired finish size before initiating flowers.
Yes	No	N/A	B, PY, PM	BM, SM, T, WF	150 ppm Florel early to disbud and promote branching	300 ppm Cycocel	1000 ppm B-9 + 250 ppm Cycocel tank mix	Avoid stress. Space plants adequately for best habit.
No	Yes	As needed to shape	B, PY, R	A, T, FG	1000-2000 ppm B-9	300-500 ppm Florel	2-3 ppm Bonzi drench once finish size for holding	Prefers high light and cool temps. PGRs can delay flowering 1-2 weeks.
No	Yes	7-15	B, R, PY	A, T, FG	2500-3000 ppm B-9	1-4 ppm Bonzi drench	1-2 ppm Sumagic	Acidifying fertilizer with iron recommended. Pinch pre-transplant. PGR rates may need adjusted based on temperatures.
No	No	N/A	B, R, PY	A, T, FG	None	1-4 ppm Bonzi drench		Acidifying fertilizer with iron recommended. Pinch pre-transplant.
No	Yes	As needed to shape	DM, PM, B, PY	A, WF, MB, T	300-500 ppm Florel	300 ppm Florel + 100 ppm Configure		Grow at temps > 60˚F and avoid overwatering to control stretch. Spray preventatively to control downy mildew.
No	Yes	As needed to shape	DM, PM, B, PY	A, WF, MB, T	300-500 ppm Florel	302 ppm Florel + 100 ppm Configure		Grow at temps > 60˚F and avoid overwatering to control stretch. Rodeo Drive' is PGR sensitive. Spray preventively to control downy mildew.
No	Optional	As needed to shape	PY, R, PM	FG, BM, SM, SF	2500 ppm B-9 + 1000 ppm Cycocel as needed			Provide high light, humidity, heat. Maintain soil temps well above 60F˚F (16˚F).
No	No	N/A	B	A, MB, T, BM, SM	None			Extremely sensitive to paclobutrazol.
No	Optional	10-14	PM, PY, R	A, T, BM, SM, FG	2500 ppm B-9	0.1-0.2 ppm Bonzi if necessary		Complete 17-5-17 fertilizer recommended. Very responsive to PGR's.
No	Optional	10-14	PM, PY, R	A, T, BM, SM, FG	2500 ppm B-9	0.5 ppm Bonzi		Powdery Mildew prevention program is required. Complete 17-5-17 fertilizer recommended. Very responsive to PGR's. Pinch plants in 5" and larger pots leaving 2 nodes.
No	Yes	10-14	PM, PY, R	A, T, BM, SM, FG	2500 ppm B-9	1000 ppm Cycocel + 1200 ppm B-9 tank mix		Transplant deeply. Complete 17-5-17 fertilizer recommended. Very responsive to PGR's.
No	Yes, multiple	14-20	FLS, PY, R, F	A, MB, T, SM, WF	300 ppm Configure for increased branching	2500 ppm B-9 for toning		Require high light and heat. Do not use PGRs on stressed or weak plants.

Benefits from shade?	Pinching	Transplant to Pinch (days)	Disease	Pests	PGR Option 1	PGR Option 2	PGR Option 3	Tips
No	Yes	At transplant	B, PY, SC	WF, SM	1000-2500 ppm B-9	0.5-1 ppm Bonzi drench		Cold sensitive. Do not oversaturate soil. Do not use Florel.
No	Yes	7-14	B, PY	A, T, WF, FG	None			Do not overwater, prefers dry cycles. Requires high light and heat. Sensitive to salts (fertilizer).
No	Yes	7-14	B, PY	A, T, WF, FG	None			Do not overwater, prefers dry cycles. Requires high light and heat.
Yes	Yes	As needed to shape	B, PM, PY	A, BM, SM, FG, SF	None			Do not overwater. Acidifying fertilizer recommended. Avoid temps >75°F.
No	No	N/A	B, R, X	T, WF, FG, SM	750-1500 ppm Cycocel as needed	250-350 ppm Florel after transplant for branching		Do not apply Florel within 8 wks of ship date. Maintain pH >5.8 to avoid iron/manganese toxicity. Alternate 15-5-15 with 20-10-20.
No	Yes	As needed to shape	B, R, X, PY	T, A, FG	750-1500 ppm Cycocel as needed			Maintain pH >5.8 to avoid iron/manganese toxicity. Alternate 15-5-15 with 20-10-20. Avoid over fertilization.
No	Yes	As needed to shape	B, R	A, T, FG	750-1500 ppm Cycocel 10 days post-transplant	750-1200 ppm Cycocel + 1500-2000 ppm B-9 tank mix		Avoid rapid temp or moisture swings. Plant liners at or slightly below media surface. Provide high light and space on time to control growth. Cold, wet environment will increase Pythium chances.
No	Yes	As needed to shape	B, PY, R, X	T, WF, FG, SM	750-1500 ppm Cycocel			Avoid rapid temp or moisture swings. Avoid over-irrigating or over-fertilizing. Cold, wet environment will increase Pythium chances.
No	No	N/A	B, PY, R, X	T, WF, FG, SM	750-1500 ppm Cycocel as needed	350-500 ppm Florel for branching and bud removal		Do not apply Florel within 6-8 weeks of ship date. Maintain pH > 5.8 to avoid iron/manganese toxicity. Alternate 15-5-15 with 20-10-20.
No	No	N/A	B, R, X	T, A, FG	500-1500 ppm Cycocel as needed	1200 ppm Cycocel + 2500 ppm B-9 tank mix		Do not apply Florel within 6-8 weeks of ship date. Maintain pH > 5.8 to avoid iron/manganese toxicity. Alternate 15-5-15 with 20-10-20.
No	Optional	Pinch before cooling	B, PY, R, X	T, WF, FG, SM	750-1500 ppm Cycocel			Vernalize liners once roots are established. See culture guide for vernalization temps and flowering daylength. Avoid over-irrigating, over-fertilizing, and excess humidity. Alternate 15-5-15 with 20-10-20.
No	Optional	As needed to shape	B, PM, RR	A, WF	6-8 ppm Sumagic	1-2 ppm Bonzi drench to hold		Will grow aggressively if provided high fertility and ample water. Ship as soon as pots full to avoid excessive runners and tangle. Habit is improved with 6-8 weeks vernalization at 35-40°F (1.6-4.4°C).
No	Yes	7-14	PY, R, PM	A, WF, BM, SM, FG, SF	None			Do not overwater. Provide proper spacing.
Yes	No	N/A	PY, R, PM, INSV	T, BM, SM, FG, SF	Optional, 1-3 ppm Bonzi if needed to control plant size at or near finish			Avoid late Bonzi drenches. Plant height is best controlled with a negative DIF or morning DIP when needed to keep plants compact. Provide shade in high light, high temp environments.
No	No	N/A	PY, R, PM, INSV	T, BM, SM, A	1000-1500 ppm B-9			Cooler temperatures at 65°F (18°C) days and 55°F (13°C) nights when finishing can be used to tone. Good air circulation and humidity management are important for Botrytis control.
No	Yes	7-14	P	A, SM, T, JB	None			Avoid high ammonium fertilizer and high EC's. Leach with clear water if needed. Soft pinch at transplant to promote basal branching.
No	Yes	As needed to shape	PY, R	A, WF, T, LM	Optional 1500 ppm B-9 + 1000 ppm Cycocel tank mix	Optional 10 ppm Sumagic	Optional 2 ppm Bonzi	Cold, wet conditions hinder growth and increase disease pressures. Prefers high light. Avoid high EC's. If not pinched in prop, pinch 1.5-2 weeks after transplant.
No	Yes	As needed to shape	PY, R	A, WF, T, LM	Optional 1500 ppm B-9 + 1000 ppm Cycocel tank mix	Optional 10 ppm Sumagic	Optional 2 ppm Bonzi	Cold, wet conditions hinder growth and increase disease pressures. Prefers high light. Avoid high EC's. If not pinched in prop, pinch 1.5-2 weeks after transplant.

	Supplemental Light	Prop PGR Option 1	Prop PGR Option 2	TIPS
	None	None		Prefer high light and warm temps. Good air circulation is important.
	None	None		Use bottom heat, high humidity, and well-drained media.
	None	None		Good soil to stem contact is essential. Excessive misting will cause yellowing foliage and delay rooting.
	None	2500 ppm B-9	150-200 ppm Florel once roots reach edge of cell	Reduce mist and apply fertilizer starting at 75ppm at root strike. Excessive mist will delay rooting and promote Botrytis. Low light can cause stretch.
	14 hr days	300 ppm Cycocel once in prop	50 ppm Cycocel every 1-2 weeks	Use care when sticking to not cover the apical growing point of the cutting by arranging the large leaves in one direction. Provide long days (16+ hrs).
	16 hr days	750-1500 ppm Cycocel as needed		Use care when sticking to not cover the apical growing point of the cutting by arranging the large leaves in one direction. Provide 16 hr days for first 7 days after stuck.
	16+ hr days	250-300 ppm Cycocel	100-150 ppm Configure for branching	Use care when sticking to not cover the apical growing point of the cutting by arranging the large leaves in one direction. Provide long days (16+ hrs), bottom heat, high humidity, and low stress. No night mist after first 24 hours. Do not allow to become root bound.
	None	300-500 ppm Florel	750-2000 ppm B-9 mid-prop or shortly after transplant for all cultivars except Bidy Gonzales	Excessive mist will cause stretch. Good soil to stem contact is required.
	None	300-500 ppm Florel	750-1000 ppm B-9	Good soil to stem contact important. Reduce mist once cuttings callus and roots form to avoid iron deficiency. Acidifying fertilizer recommended.
	None	300-500 ppm Florel		Good soil to stem contact important. Reduce mist once cuttings callus and roots form to avoid iron deficiency. Acidifying fertilizer recommended.
	None	350-500 ppm Florel 10 days post-stick for branching	1500-2500 ppm B-9 or 100 ppm Configure	Avoid excessive mist to control stretch. Transplant on time.
	None	350-500 ppm Florel 10 days post-stick for branching	1500-2500 ppm B-9 or 100 ppm Configure	Avoid excessive mist to control stretch. Transplant on time.
	14 hr days	None		Provide high temps, humidity, and light. Remove flowers in prop.
	None	100 ppm Configure for branch-ing		Avoid excessive water after root strike.
	14 hr days	1500-2500 ppm B-9	300-500 ppm Florel	Provide long days (14+ hrs) to avoid tuber formation. Stick cuttings deep to first set of leaves. Keep evenly moist.
	14 hr days	1500-2500 ppm B-9	300-500 ppm Florel	Provide long days (14+ hrs) to avoid tuber formation. Stick cuttings deep to first set of leaves. Keep evenly moist.
	14 hr days	1500-2500 ppm B-9 or 6-10 ppm Configure	300-500 ppm Florel	Provide long days (14+ hrs) to avoid tuber formation. Stick cuttings deep to first set of leaves. Keep evenly moist.
	None	2500 ppm B-9 for toning		Cut down mist as soon as cuttings can stay turgid on their own. Can consider remay cover if high humidity isn't achievable.
	None	B-9 if needed		Ethylene sensitive - priority 1 sticking. Set mist to maintain a film of water on leaves. Mist in evening until cuttings have regained turgidity.
	None	None		Avoid overmisting or over saturating media. Apply preventative fungicide after sticking. Must grow warm for success.
	None	None		Avoid overmisting or over saturating media. Apply preventative fungicide after sticking. Must grow warm for success.
	18 hr days	None		Excessive misting can inhibit rooting. Do not use Florel.

	None	1500-2500 ppm B-9	350-500 ppm Florel 12-21 days post-stick	Stick immediately upon arrival. Best rooted in strip for increased airflow. Mist only enough to keep leaves turgid. Maintain light intensity of 700-1200 fc until callus, 2000-2500 fc during root initiation, and 2500-4000 fc for toning. Do not apply Florel within 6-8 weeks of ship date.
	When light falls below 1000 fc	1000-2000 ppm B-9 + 750 ppm Cycocel tank mix 14-21 days post-stick		Stick immediately upon arrival. Best rooted in strip for increased airflow. Mist only enough to keep leaves turgid. Maintain light intensity of 700-1200 fc until callus, 2000-2500 fc during root initiation, and 2500-4000 fc for toning.
	None	1500-2500 ppm B-9		Stick immediately upon arrival. Best rooted in strip for increased airflow. Ivy geraniums require less mist than zonals. Discontinue misting at root emergence. Maintain light intensity of 700-1200 fc until callus, 2000-2500 fc during root initiation, and 2500-3000 fc for toning.
	None	Optional; 750-1500 ppm B-9 + 600 ppm Cycocel 14-21 days post-stick		Stick immediately upon arrival. Best rooted in strip for increased airflow. Ivy geraniums require less mist than zonals. Discontinue misting at root emergence. Maintain light intensity of 700-1200 fc until callus, 2000-2500 fc during root initiation, and 2500-3000 fc for toning.
	When light falls below 1000 fc	1000-2000 ppm B-9 + 750 ppm Cycocel 14-21 days post-stick	350-500 ppm Florel 14-21 days post-stick	Stick immediately upon arrival. Best rooted in strip for increased airflow. Mist only enough to keep leaves turgid. Maintain light intensity of 700-1200 fc until callus, 2000-2500 fc during root initiation, and 2500-4000 fc for toning. Do not apply Florel within 6-8 weeks of ship date.
	None	1500-2500 ppm B-9	350-500 ppm Florel 12-21 days post-stick	Stick immediately upon arrival. Best rooted in strip for increased airflow. Mist only enough to keep leaves turgid. Maintain light intensity of 700-1200 fc until callus, 2000-2500 fc during root initiation, and 2500-4000 fc for toning. Do not apply Florel within 6-8 weeks of ship date.
	When light falls below 1000 fc	1000-2000 ppm B-9 + 750 ppm Cycocel 14-21 days post-stick		Stick immediately upon arrival. Best rooted in strip for increased airflow. Maintain constant film of water on leaves without overirrigating media and do not allow to wilt for first 3 days. Once rehydrated, drier conditions and high light will speed rooting. Reduce temperatures to 58-62°F (14-17°C). Maintain light intensity of 700-1200 fc until callus, 2000-2500 fc during root initiation, and 2500-4000 fc for toning.
	None	5-6 ppm Sumagic	1500-2500 ppm B-9	Requires PGRs in the liner stage to control growth.
	None	None		Maintain high temperatures throughout crop. Avoid excessive mist.
	None	125-300 ppm Florel 5 days post-stick	1-2 ppm Bonzi as needed to control stretch	Avoid excessive mist to control stretch. Mist moderately first 3-5 days to keep turgid. Maintain even moisture in prop.
	None	1500-2000 ppm B-9	2 ppm Configure as needed for stretch	Avoid excessive mist to control stretch. Mist moderately first 3-5 days to keep turgid. Transplant on time to minimize stretch.
	None	None		Stick immediately upon arrival. Keep warm, cool temps will slow prop and possibly damage cuttings. Provide shade for the first few days in propagation. Move off mist as soon as possible to avoid stretch.
	Optional	None		Can be somewhat slow to root. Until roots have established, keep plants consistently misted in low amounts. Once rots form supplement light on low-light days.
	Optional	Optional 1500 ppm B-9 + 750 ppm Cycocel tank mix	Optional 1500 ppm B-9 + 350 ppm Florel tank mix for lateral branching	Can be somewhat slow to root. Until roots have established, keep plants consistently misted in low amounts. Once rots form supplement light on low-light days.
	None	250 ppm Florel		May require night misting during first 8 days. Mist just enough to keep turgid. A preventative drench for pythium is recommended, Use low ammonium and phosphorus fertilizer to reduce stretch.
	None	None for Top Lavender and Top Purple; 1500-2500 ppm B-9 for others		Pinch in prop to promote branching and remove flowers. Mist just enough to keep turgid. Sensitive to fertilizer salts. Use a preventative fungicide to prevent root rot. Use 4-6 ppm Pageant to prevent Botrytis.
	None	100-150 ppm Configure to promote branching if not pinched		Shade may be needed to protect cuttings for first week after sticking and should be reduced as cuttings root. Neutral DIF, moderate light, and reduced phosphorus fertilizers are suggested to control stretch.
	None	None		Do not dibble the cell at stick, water thoroughly after stick to "seat" the cuttings. Stem-to-media contact is critical.
	None	300 ppm Florel at day 20		Use a well drained media. Avoid overmisting. Apply a broad spectrum preventative fungicide in the first few days. Once established do not allow liners to dry down excessively.

	Supplemental Light	Prop PGR Option 1	Prop PGR Option 2	TIPS
	none	1500 ppm B-9 if needed		Apply a broad spectrum preventative fungicide in the first few days.
	Optional	2500 ppm B-9	250 ppm Florel + 500 ppm B-9 tank mix	Apply only enough mist to keep cuttings turgid. Consider applying Capsil. Mist should be warm to maintain prop temps. Do not allow to wilt.
	None	750-1500 ppm B-9	300-500 ppm Florel	Maintain high humidity for first 14 days.
	None	250 ppm Florel + 500 ppm B-9 tank mix	750 ppm B-9	Water in well after sticking to seat cuttings. Feed with supplemental iron if chlorotic. Can be pinched in liner stage.
	None	250 ppm Florel + 500 ppm B-9 tank mix		Water in well after sticking to seat cuttings. Feed with supplemental iron if chlorotic. Naturally compact series. Can be pinched in liner stage.
	None	250 ppm Florel		Water in well after sticking to seat cuttings. Feed with supplemental iron if chlorotic. Can be pinched in liner stage. Series is naturally compact.
	None	350-500 ppm Florel	1500-2500 ppm B-9 or 100 ppm Configure	Avoid excessive mist to control stretch. Transplant on time to minimize stress. Tone in high light.
	None	2500 ppm B-9	100 ppm Configure for branching	Requires minimal misting. Excess mist causes disease, uneven, and delayed rooting. Discontinue misting and gradually increase light levels as roots form.
	None	2500 ppm B-9		Do not overwater liners.
	None	2500 ppm B-9		Do not overwater liners.
	None	2500 ppm B-9 + 1000 ppm Cycocel on day 10	1500 ppm B-9 + 500 ppm Florel tank mix	Leave 3 nodes after pinch to ensure proper branching without delaying crop time significantly. Avoid excessive phosphorus and ammonia-based nitrogen.
	None	None		Pinch to promote branching.
	None	None		Bottom heat recommended.
	None	500 ppm B-9 beginning 1 wk post-stick	1500 ppm B-9 + 500 ppm Florel tank mix	Back off mist once root initials form. Increase light levels once roots established.
	None	2500 ppm B-9 + 1000 ppm Cycocel	2500 ppm B-9 + 500 ppm Florel after rooting in	Watch for chlorosis. Apply iron and/or micronutrient package if needed. Pinch or trim liners to promote branching.
	None	None		Growth will be faster when light and temperature are not limiting. Manage soil moisture closely, too wet and the sensitive roots will be damaged.
	None	None		Growth will be faster when light and temperature are not limiting. Manage soil moisture closely, too wet and the sensitive roots will be damaged.
	None	None		Growth will be faster when light and temperature are not limiting. Manage soil moisture closely, too wet and the sensitive roots will be damaged.

OVERALL CONDITIONS

PRICING & AVAILABILITY

- Pricing is effective from: Week 40, 2026 to Week 39, 2027.
- Prices are subject to change without notice.
- All prices are F.O.B. point of origin.
- Orders subject to potential additional fee should a phyto certificate be required.
- Pricing on NEW items shipped prior to Week 40 will be consistent with the attached program.
- Any applicable tariff charges will be an added line item on the final invoice.
- Pricing window does not mean guaranteed availability. Availability is subject to change.

TAG TERMS

- Tag order cut off is Wednesday 12:00 pm EST, 14 days prior to ship to ensure tag delivery with product delivery, regardless of form.
- Any tag orders placed after cut off will have a 7 -10 day delivery time from day of tag order placement.
- Tags are included 1:1 unless specified, "No Tags"
- Annuals Tags will be shipped in increments of 50, Foliage Succulents in increments of 100. Any requested tag ratio that does not correspond to that pack unit will be rounded up and billed accordingly.

POD REQUESTS

- Requests for Proof-of-Delivery must be submitted within thirty (30) days of the ship day. All claims for lost or misrouted product will be denied after thirty (30) days.

CLAIMS

- All claims must be submitted in writing within eight (8) business days of receipt of the shipment to: QN@dummenorange.com.
- Calling or emailing a sales person or technical person does not qualify as a "claim" submission, Claims must be submitted in writing.
- Well-documented claims greatly assist in Dümmen NA, Inc.'s prompt processing of each claim. The following documentation is required in order to process a claim:
  - Purchase order number (when applicable).
  - Dümmen confirmation or invoice number.
  - Statement describing the issue.
  - Date the product was received. (Week it was received.)
  - Quantities listed by variety (Qty with issue/total quantity received).
- Photographs (must be submitted within 72 hours of initiating a claim) and must include:
  - Farm tag (photo from each variety being claimed, if the customer has it).
  - Box label (where applicable).
  - Tray label (where applicable).
  - Photo of cuttings, plants, boxes, etc., showing the problem.
  - Scope of the problem (photo of large group of cuttings, bench, etc).
  - Final counts must be reported within 30 days.
- All claims that do not follow the aforementioned process will be denied.

DISCLAIMER

- Dümmen Orange is not responsible for orders placed or shipped for crops that are restricted, prohibited, or otherwise non-compliant with applicable laws or regulations. Responsibility for ensuring compliance rests solely with the customer. Foliage Succulents can only be distributed within US/CAN only.

SPECIAL FORM CONDITIONS

UNROOTED CUTTINGS

(URC, URC - AutoStix, URC - Combinations, and URC - Quick Turn)

- Minimum Order: 3,000 per FOB (farm) within a shipping week.
- Pack Sizes:
  - URC: 100 cuttings per bag.
  - Quick Turn: 100 cuttings per bag.
  - Combinations: 100 cuttings per bag of each component in the listed recipe.
  - AutoStix: 100 cuttings per set of strips (cuttings may be inserted into a 51 or 34 strip depending on the variety cutting size).
- Overpack: 2% for AutoStix, 4% for all others. Orders under 3,000 but greater than 1,500 will incur a $30.00 handling fee/order.
- Orders under 1,500 will incur a $55.00 handling fee/order.
- Order cutoff for new orders and revisions: URC (001, 002, 004), AutoStix (A01 and A02), and Quick Turn (701) is Tuesday at 12:00 pm EST one (1) week prior to ship, excluding below exceptions.
- Order cutoff for Epiphyllum varieties is Friday at 12:00 pm, EST three (3) weeks prior to ship.
