Post-Turn Cleaning & Maintenance

Preventative Maintenance*

Lights	Test efficiency and clean according to manufacturer's direction. Replace/repair lights causing dim spots in crop zone.
Screens	Check for rips & physically clean screens. Maintenance any automated deployment systems.
HVAC	Change/clean filters and lines as needed. Test efficiency and function. Maintenance according to manufacturer's direction.
Electrical	Inspect all outlets, lines and connections. Work with local professionals to ensure all fixtures and usages are up to code.
Structural	Cleaning glazing is a great time to check and repair roof leaks. Inspect facility for obvious damage and repair according to local codes.
Water Treatment	All components should be inspected and maintained according to manufacturer's direction. Reservoirs should be inspected and cleaned with a material safe product. Underground tanks and holding ponds should be inspected for leaks and maintained accordingly.
Carts & Racks	Grease and inflate wheels. Inspect and correct potential cut hazards. Tighten any loose fasteners.
Tools etc.	Sharpen pruners, sheers and blades. Calibrate and maintenance all meters and weather stations. Clean and service vehicles and motorized equipment.

*Always check product & equipment labels for approved methods and PPE requirements.
