PGR SUGGESTIONS

- None

TIPS

- As with all vegetative cuttings, sticking upon arrival is ideal. If this isn't possible, store in a cooler at 45° F (7°C) for no more than 16 hours after delivery.
- Reduce mist as soon as cuttings become turgid (generally 1-2 days after stick). Avoid over misting and over watering.

PGR SUGGESTIONS

- 5-8 ppm Sumagic (0.055% Uniconazole)
- 1-2 ppm Bonzi (0.4% Paclobutrazol) drench as needed

TIPS

- Saturated soil media should be avoided at all costs, or Pythium and Botrytis can set in.
- Plants best grown outdoor in full sun.
- Utilize drip irrigation.
- Preferred growing is on final spacing or plants may become leggy.

DESCRIPTION

Agastache is a great all-season crop that performs extremely well in hot areas. It will flower from summer into fall featuring new vivid colors.

CONSUMER APPEAL

- The slender tube-like blooms help to attract all sorts of pollinators including butterflies and hummingbirds.
- Agastache works well along sunny borders, cottage gardens, pollinator gardens and in herb/sensory gardens. The aromatic foliage and tendency to attract butterflies make this plant a great choice for alongside patios or other high-traffic areas.
- Deadheading spent flower spikes will help promote flowering.

GARDEN ATTRIBUTES

- Tolerant of many soil conditions ranging from medium to moist though well-drained is preferred. These plants can be relatively drought resistant once established after several years. Poorly drained or heavy clay soils may prevent this perennial from overwintering due to root rot issues.

NATIVITY

- China, Vietnam, Korea and Japan
