DESCRIPTION

Oregano is a must-have herb for anyone planning to make Italian cuisine in the near future. Pasta, lasagna, ravioli...you name it, Oregano will undoubtedly improve it.

CONSUMER APPEAL

- Herbs and edibles are a trendy addition to any garden regardless of gardening experience. Children in particular should be included in the multi-sensory experience of an herb garden. Encourage them to touch, crush, smell, taste, and immerse themselves in the wonderful charm of herbs.
- The potent taste and fragrance of herbs makes them naturally resistant to rabbits, deer, and most herbivorous insects.

GARDEN ATTRIBUTES

- Excellent in cottage gardens, sensory gardens, and fragrance gardens. Herbs are an ideal choice for high traffic areas like walkways or entryways into a residence. Their versatility spreads to containers and even houseplants if properly cared for. Can work equally well inter-mixed other perennials.
- Herbs can be a clever and unorthodox addition to cut flower arrangements to create a truly zesty bouquet. Or, dry your herbs to enjoy them out-of-season
- Similar to its native growing conditions, oregano prefers to grow in very well drained, oftentimes rocky/sandy soils that do not experience saturation for extended periods of time. This plant actually prefers neutral to alkaline (high pH) soils.
- Herbs should not be allowed to flower at any time during their lifecycle. Flowering will alter the desired fragrance profile in addition to making the herb extremely bitter and unpalatable.

COMPANION PLANTS

French tarragon, lemon verbena, lemon balm, mint, basil, rosemary, sage, thyme, sweet marjoram, stevia

COMMON NAME(S)

Oregano

'Hot & Spicy'

NATIVITY
