Look for the icon

Look for the icon throughout this leaflet to identify Rose varieties with gene(s) that make the variety resistant to certain Agrobacterium and Powdery mildew isolates for a more sustainable and economically protected future. Please feel free to contact us for more information.

Imagine a future...

Where Agrobacterium and Powdery mildew is a worry of the past

Intrinsa® from Dümmen Orange brings varieties to the market using the science of advanced breeding where the desired approach for developing improved performance on high disease resistance is identified. As a result of this breeding approach, the Intrinsa® collection of Roses now offers you a natural defense against Crown gall disease and Powdery Mildew.

Scan the code for more information:

At *Agrobacterium tumefasciens/Agrobacterium rubi* I Crown gall disease

Po *Podosphaera pannosa* I Powdery Mildew
