2027-2028

Order plants online!

Our Webshop Benefits

Our easy to use webshop is made for your convenience.

- Real-time availability
- Fast order confirmations
- Adjust your orders
- Surplus sales
- Import orders via Excel
- Substitutes
- Growth Strategies

Using our webshop can save you a lot of time, because you order directly on availability and your order is confirmed within minutes. You can easily adjust your orders online.

We help you out with handy tools like providing substitutes during the ordering process, an order import tool via Excel and we provide growth strategies to optimize your production.

Please visit our website for more information or scan the QR code below. Here you can also apply for an account.

About this year's Pot Plants & Poinsettia catalogue

In this catalogue, we are delighted to showcase the Dümme Orange® Pot Plant and Poinsettia assortment, bringing together proven favourites and exciting new varieties for professional growers across Europe.

Our **Pot Plant** portfolio reflects the very best of our breeding expertise. Alongside trusted varieties of Pot and Garden Mum, Pot Aster, Kalanchoe, Saintpaulia and Euphorbia milii, you will discover new introductions selected for their strong performance, vibrant colours and excellent shelf life. Together, they offer fresh opportunities for successful programmes and inspiring retail displays.

Our **Poinsettia** assortment has been developed with the same focus on reliable production and

strong consumer appeal. From high-density mini production and classic reds to distinctive specialty colours, the range offers strong rooting, predictable response times and uniformity, combined with attractive bract presentation and excellent shelf life.

With innovations such as our peat-free Targa rooting system, we continue to support growers in responding to changing market demands while maintaining the quality and performance they expect.

We hope this catalogue serves as a practical source of inspiration and supports your planning for the seasons ahead. We look forward to growing success together with Dümme Orange.

Discover Intrinsa® plants powered for a greener future.

Intrinsa® brings advanced techniques through traditional breeding with the ambition of creating sustainable and economically viable plants for a greener future.

Connecting the world

Intrinsa allows for greater accessibility of plant material produced from more countries worldwide for a broader availability to your garden.

Transforming supply

Intrinsa advanced breeding techniques help make crops more reliable for greenhouse and nursery growers, ensuring a steady supply of your favorite blooms.

Making homes and gardens greener

Intrinsa technology identifies unique DNA patterns with natural disease resistance, reducing pesticide needs using these innate genetics.

Invest in the future

By investing in the Intrinsa® brand

Stronger, healthier plants

By advanced breeding technology

True beauty comes from within

Plant power breeding by Intrinsa®

Look for the icon

Look for the Intrinsa® icon to identify chrysanthemum varieties which have high resistance to CWR and Fusarium Wilt for a more sustainable and economically protected future.

Chrysanthemum White Rust

Fusarium Wilt

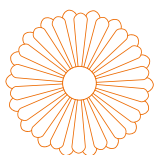

Imagine a future where Pot and Garden Mum White Rust and Pot Mum Fusarium Wilt is a worry of the past.

Intrinsa® breeding with Pot Chrysanthemum and Garden Mum – Your best defense against White Rust and Fusarium Wilt comes from the plant power within.

Intrinsa® from Dümmer Orange brings chrysanthemum varieties to the market with a natural defence against Fusarium wilt and chrysanthemum white rust (CWR). Through advanced breeding, varieties are selected for high resistance to both soil-borne Fusarium and the leaf-infecting CWR fungus. In trials under high infection pressure, resistant varieties show no to very few symptoms, helping reduce disease spread, crop losses and reliance on chemical treatments for more reliable production.

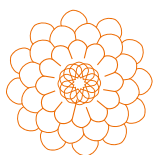

BREEZE

Fresh singles

The Breeze series is refreshingly beautiful. This single-flowered series-freshens up every interior or exterior space. Sparkling flower colours around a green centre, what's not to love? Let Breeze surprise you!

CHRYSTAL

Strong decoratives

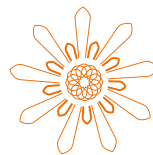

Quality has never been so accessible. The decorative Chrystal series blooms in every climate and is there for you to enjoy. Whatever shelf or growing condition, Chrystal will be filled with petals.

RAINBOW

Passionate bicolours

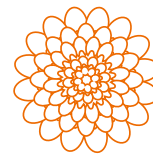

It is no surprise we named this series Rainbow. Like sunshine after rain, this series certainly brightens up your day. This single-flowered series is characterized by the stunningly beautiful bi-colour effects wrapped around a fresh green centre.

SPLASH

Exciting specialties

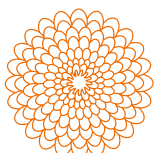

Through years of breeding, we are able to offer you some splashing varieties. This specialty line has three very exciting options to offer, all with extravagant flower types.

SUNTASTE

Exceptional shelf life

These stunning potmums feature large, vibrant anemone-type blooms in a variety of eye-catching colours. Grown with care for maximum performance, Suntaste offers exceptional shelf life.

GEMPOP

Mini decorative flowers

The GemPop series impresses with many decorative mini flowers, very even, good branching and intensely bright colours. With yellow, red, pink, purple and white, all the main colours are already available for the launch.

SMARTY

Compact abundance

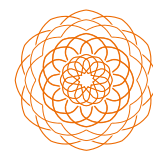

The Smarty series delivers dense, spherical blooms. Each flower presents tightly packed petals, ensuring a full and lasting display. Perfect for vibrant accents in any garden or container.

SWEETIE

Sculpted elegance

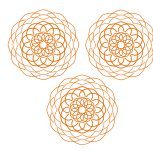

Our Sweetie series features blooms with uniquely sculpted, spoon-shaped petals. These intricate flowers form elegant, concentric layers around a defined core, creating a sophisticated and captivating display.

COSMO

Classic disbuds

All varieties in this series have large, beautifully incurved flowers with endless petals. On top of that, they are easy to grow and require little growth regulators. Be inspired by these classical beauties!

COSMO COMPACT

New generation disbuds

Market is changing rapidly in regards of usage of growth regulators. Developed of the well known Cosmo varieties, but growers don't need to use any grow regulator.

Pot Mum Breeze

Breathe life and colour into your everyday with the Breeze series, featuring sweet and delicate daisy flowers and a green center.

Poinsettia

About this year's Poinsettia Assortment

Our Poinsettia assortment combines proven performance with strong retail appeal, offering reliable choices for a wide range of production programmes, from high-density minis and classic reds to distinctive specialty colours.

This catalogue also brings exciting additions to the range. The J'adore series expands with the introduction of **J'Adore Hot Pink** and **J'Adore Neon Red**, bringing the collection to five vibrant colours and creating even more opportunities for colourful retail concepts.

We are also proud to introduce **Nordra**, a beautiful poinsettia with a strong and attractive V-shaped habit. Reliable and robust throughout cultivation, Nordra is a true "foolproof" variety: easy to grow, predictable in production and consistent in its final result.

Across the assortment, growers can rely on strong rooting, uniformity and predictable response times, combined with the characteristics that matter at retail, including attractive bract presentation, excellent shelf life and a consumer-friendly habit.

With our peat-free Targa rooting system, we continue to support more sustainable poinsettia production. Many varieties in the assortment perform particularly well in peat-free substrates, helping growers respond to changing market requirements without compromising on quality. Explore the following pages to find the right varieties for your early, mid and late-season programmes, as well as minis, specialties and inspiring colour concepts.

100% Peat-free Youngplants **Best Quality With Our Targa Rooting System**

BACK TO THE ROOTS

Last season we introduced the new version of the Targa tray and can proudly say that we had a great season with the highest quality. In addition to many advantages in handling of trays and in logistics, the comeback of the Targa tray led to a significant quality improvement. Next to that, this Targa plug for poinsettia is 100% peat-free. This makes it possible to produce 100% peat-free poinsettias.

Our new varieties have already been tested and selected for peat-free production. Noblesse and Imperial are particularly recommended for peat-free production and deliver an excellent end product that meets the demands of retailers and consumers for 100% peat-free poinsettias.

SHORT & SWEET

- Better roots & bigger plug for better root distribution
- More equal irrigation
- Irrigate just in time / irrigation for delivery
- Faster dry up of the plug
- More active rooted cutting
- Quicker start after potting

J'Adore

HIGHLIGHT

Early Season J'Adore

J'Adore is a series of interspecific euphorbia hybrids for dynamic, modern-day holiday decor. These varieties give your program a touch of luxe with layers of velvety bracts in pastel pink and rich touchable textures. The versatility of J'Adore varieties allows us to lean on these performers from the early season, all the way through New Year's promotions, for an elegant and glamorous program.
