

ANNUAL
PROPAGATION
DAHLIA DAHLINOVA®

Dahlia x hybrida

TRAY & ROOTING

Form	Vegetative Cutting (URC)
Rooting Hormone?	No
Tray Size	72, 102
Plants Per Cell	1
Days In Mist	5-10
Wks. From Stick To Transplant	3-4
Propagation Pinch?	Yes
Weeks To Pinch	3

FERTILITY

Fertilize Through Mist?	50-75ppm N
Fertilizer Rate	100-150ppm N
EC Range	Moderate: (2.0-3.5 mS via SME)
pH Range	5.6-6.2

TEMPERATURE

Average Soil Temp	70-75°F (21-24°C)
Average Air Temp (Day)	70-75°F (21-24°C)
Average Air Temp(Night)	65-68°F (18-20°C)

IRRIGATION

Irrigation Frequency	Level 4: Keep media moderately moist at all times
----------------------	--

LIGHT

Daylength Neutral?	No
Supplemental	14 hour days
Benefits From Shade?	No

POTENTIAL DISEASES

Rhizoctonia, mildew

POTENTIAL PESTS

Thrips, Fungus Gnats, Aphids

PGR SUGGESTIONS

- 1,500-2500ppm B-Nine (85% Daminozide) spray

TIPS

- Stick deeply up to the first set of leaves to allow stem roots to form.
- An optimal growing mix should be well drained with sufficient moisture retention to prevent daily wilting.
- Dahlias, in general, should be kept evenly moist avoiding dramatic wet-dry cycles

FINISHING

DAHLIA DAHLINOVA®

Dahlia x hybrida

CONTAINER SIZE	PLANTS PER POT	TRANSPLANT TO FINISH (WEEKS)
----------------	----------------	------------------------------

4 in. (10 cm) and up	1	6-8
-----------------------------	----------	------------

6 in. (15 cm)	1	7-9
----------------------	----------	------------

8 in. (19 cm)	3	7-9
----------------------	----------	------------

FERTILITY

Fertilizer Rate	150-200 ppm N
-----------------	----------------------

EC Range	High: (3.5-5 mS via SME)
----------	---------------------------------

pH Range	5.6-6.2
----------	----------------

TEMPERATURE

Day Temperature	65-73°F (18-23°C)
-----------------	--------------------------

Night Temperature	68-75°F (20-24°C)
-------------------	--------------------------

IRRIGATION

Irrigation Frequency	Level 3: Keep media moderately moist with mild dry cycles
----------------------	--

LIGHT

Daylength Neutral?	No
--------------------	-----------

Optimum Light Level	4,500-9,000 (48,400-96,900 lux)
---------------------	--

Supplemental	14 hour days
--------------	---------------------

Benefits From Shade?	No
----------------------	-----------

PINCHING

Finishing Pinch?	No
------------------	-----------

Transplant to Pinch (days)	N/A
----------------------------	------------

POTENTIAL DISEASES

Rhizoctonia, mildew

POTENTIAL PESTS

Thrips, Fungus Gnats, Aphids

PGR SUGGESTIONS

- 2,500ppm B-Nine (85% Daminozide) spray
- 0.1-0.2ppm Bonzi (0.4% Paclobutrazol) if necessary

TIPS

- A complete blend 17-5-17 fertilizer is the best for a balanced well-shaped finished product.
- Dahlias are very responsive to PGRs; use the least harsh chemical treatment in your greenhouse to avoid stunting plants.
- Plants must be grown under long days with a minimum daylength of 14 hours but no more than 16 hours of sunlight a day. More than 16 hours daily will promote vegetative growth and delay flowering. Nighttime interruptions are not recommended as a substitut
- Plants should be pinched leaving two nodes 10-14 days after transplanting liners. Liners can be pinched at transplant if liners are not hardened or stressed. Earlier pinching will reduce crop time.

ANNUAL

FEATURES AND BENEFITS

DAHLIA DAHLINOVA®

Dahlia x hybrida

KEY INFORMATION

Primary Common Name	Dahlia
Consumer Watering Instructions	Water thoroughly when top 1 inch (3cm) of soil is dry.
Bloom Time	Blooms Spring to Autumn
Exposure	Full Sun to Part Shade
Height	10 inches (25 cm)
Garden Spacing	12 inches (30 cm)

DESCRIPTION

A gardener classic incorporating compact genetics and bombastic blooms.

CONSUMER APPEAL

- The very charismatic and photogenic flowers make dahlias one of the strongest impulse buys at retail.
- The visually striking “pompom” shaped flowers make great cut flowers.

GARDEN ATTRIBUTES

- Good in containers located in high-traffic areas where onlookers can appreciate the showy flowers.
- These well-rounded plants maintain uniform growth and resist lodging with their strong stems.
- Plants are very easy to grow and tubers may be dug for winter storage at the end of the growing season.

NATIVITY

Of hybrid origin: parental lineages native to Mexico.
