Salvia Spring King Series

Salvia nemorosa

KEY INFORMATION

First Year Flowering?	Yes
Bloom Time	Spring
Exposure	Full Sun
Hardiness Zone	4-10
Height	30-41 cm
Width	30 cm

DESCRIPTION

'Spring King' is truly the earliest Salvia on the market today blooming long before any other available Salvia. This earliness gives it more opportunities to rebloom later in the season if deadheaded early on.

CONSUMER APPEAL

- Salvia is one of the easiest perennials to grow, especially for gardeners whose maintenance strategy is "benign neglect".
- With its considerable flower power and strikingly full racemes/panicles, Salvia has no issues attracting pollinators like bees and butterflies. Its unmistakable foliage scent is a natural deterrent to rabbits and deer.

GARDEN ATTRIBUTES

- Can make a good cut flower and/or dried flower.
- Salvia is the perfect mainstay backbone for a sunny perennial border. Great for cottage gardens, pollinator gardens, in mass plantings, or in containers.
- The Salvia genus prefers well drained soils that go through periodic moist-dry cycles. Poorly drained soils or those that are consistently saturated should be avoided. Soil amendments such as compost or other organic matter can help Salvia thrive in clay soils.
- After the flower stalks have finished their blooming cycle, remove the entire stalk to encourage reblooming.
- Spring King was named a plant of distinction at the University of Georgia Trial gardens for the 2017 season.
